

Corrigendum

For the article: Nikolić Tošović, M., & Jovanović, V. (2020). Entrepreneurial Intention Model: Empirical Results with Management Students in Serbia. *Management: Journal Of Sustainable Business And Management Solutions In Emerging Economies*, 26(2), 15-28. doi:10.7595/management.fon.2020.0023

Since the article's publication, it has been called to our attention by Mr Miguel Angel Garcia Arias (the University of Almeria, Spain) the technical error in the Figure number 2. We thank Mr Angel Garcia Arias for this.

Due to the authors' unintentional (technical) error, the mistake was made in the graphical presentation of the values of the coefficients in Figure 2. As a result, the correct values of the standardized regression weights or the effect of Work Experience on PA is 0.166 (not -0.166), Work Experience on SN is 0.290 (not -0.290) with $p < 0.01$ (not $p < 0.00$) and Role model on PBC is 0.241 (not -0.241).

In the following is the correct Figure 2.

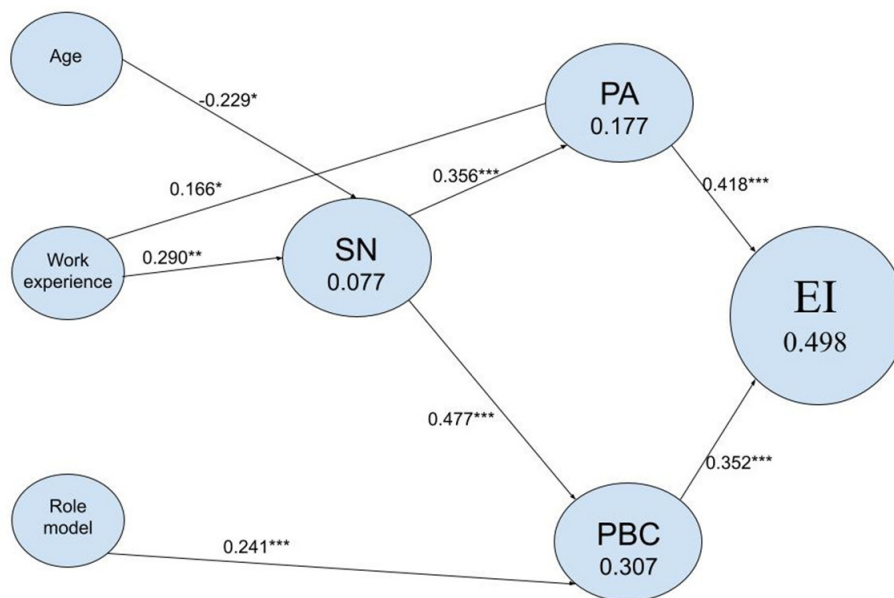

Figure 2: Entrepreneurial intention model based on results with standardized regression weights, factor loadings and R²
 * $p < 0.05$; ** $p < 0.01$; *** $p < 0.000$

The authors and the journal deeply regret and apologize for the mentioned unintentional error.
